

Mesero AI — connection diagram

Every connection in the build. The gadget hears; the phone only shows.

GABOTRIX AI®

reSpeaker XVF3800 + XIAO ESP32S3

The only soldered joint in the build is the speaker's, and it arrives already made. Everything else plugs together.

Audio path: 4 microphones → XVF3800 (echo cancellation, beamforming) → I²S → ESP32-S3 → Wi-Fi → backend → back down the same socket → amplifier → speaker.
